

High School Board Report November 2022

1. **Cross & Volleyball accolades:** We were excited to bring back some of our Spirit activities as we sent off our Cross Country and Volleyball teams off to compete in post-season play. We held a pep-assembly recognizing their accomplishments and sent a spirit bus with students to cheer on the team. Hopefully we will be able to have many more this year.
2. **Veterans Assembly:** Mrs. Braman's classes presented a very moving display for this year's Veterans Day War Fair and Assembly. The junior class really went all out this year with their presentations with pull-up and push-up competitions, paper plane distance challenges, and many other activities for the middle school students to participate in.
3. **Murphy Award:** Senior Maggie Kodish was nominated by our staff and celebrated at a breakfast as this year's first Murphy Award Recieipient. The Murphy award is given to students who exemplify service and leadership and Maggie fits both of those categories. She, although, more subtly than others leads by example. She serves in many capacities and participates in our school-wide initiatives to impact the culture of the building.
4. **Warm Fuzzies:** Mrs. Ryder and Student council brought back the Warm Fuzzies leading up to the holiday season. All classes met in the commons before lunch to encourage and appreciate one another by giving away pieces of yarn accompanied by a positive message. It was quite a moving moment to hear students and staff appreciate one another in this way.
5. **Aspire Grant:** We are 1 of 10 districts to be awarded the Aspire Innovation grant. These funds will be used to have events that support college and career readiness.

November 1, 2022

Dear Dansville Community,

Congratulations! You are one of 10 schools throughout Michigan to be awarded the Aspire High School Innovation grant. Your dedication to supporting your students as they achieve their postsecondary goals is evident and your desire to improve and innovate is admirable.

This grant will allow you to reflect on your past and current successes while learning more about your challenges in order to set goals and strategies that will further improve the success of Dansville students. Their success will impact their community and the entire state of Michigan as we all aim to have 60 percent of Michigan residents earn a postsecondary certificate or degree by the year 2030.

On behalf of the Michigan College Access Network, congratulations again on your commitment to the Dansville community.

In partnership,
